Message from the Minister

It is my pleasure to present to you, on behalf of the Department of Commerce and Technology, the 1990 Directory of Products and Manufacturers. This publication will serve as a useful tool both to outside investors and the New Brunswick business community.

This directory includes 1,631 firms which provide, at the seasonal peak, up to 57,000 jobs for people in this province. I would like to thank each manufacturer for supplying information for this directory, and trust that it will serve manufacturers, buyers and the public, both at home and abroad.

The Department of Commerce and Technology offers a number of services to the business community including industry information, marketing analysis, financial assistance programs as well as general assistance to small and medium sized business.

This year the department has made the issue of "Quality" its top priority. While quality has and always will be a major component for any successful business, the issue has taken on significant new meaning lately. With traditional trade barriers being reduced around the world, quality is becoming the new benchmark for a product's right to compete in the marketplace. Governments are restricting products which do not meet certain quality standards from entering their markets.

Many companies have received the message and have taken affirmative action. I strongly urge all companies, particularly those which export products, to contact my department for more information.

Alfred W. Lacey,
Minister
Department of Commerce and Technology

FOREWORD

HOW TO USE THE DIRECTORY

Immediately following the foreword there is a prefatory section containing general background information relative to the Province of New Brunswick

The directory consists of four major sections followed by two appendices:

SECTION 1
NEW BRUNSWICK PRODUCTS —
ALPHABETICAL CLASSIFICATION

Products manufactured in the province are itemized alphabetically in this section. Every product is followed by a list of the appropriate manufacturers' names. Details with respect to the manufacturers so listed are not repeated in this section, but may be readily obtained by reference to Section 2.

SECTION 2
NEW BRUNSWICK MANUFACTURERS —
ALPHABETICAL CLASSIFICATION

New Brunswick manufacturers are listed alphabetically by establishment name. The name is followed by the mailing address and then the plant location when it differs from the former. After this the contact's name, telephone, fax and telex numbers are indicated. Then the Standard Industrial Classification (SIC) is listed indicating the industry/ies assigned to the establishment, the first SIC listed being the major industry, for each firm. Following is a list of products and an employment figure.

Inquiries for a listing of firms by specific industry groups will be handled by the Department of Commerce and Technology upon request.

SECTION 3
NEW BRUNSWICK MANUFACTURERS —
COUNTY CLASSIFICATION

The Province of New Brunswick is divided into 15 counties: Albert, Carleton, Charlotte, Gloucester, Kent, Kings, Madawaska, Northumberland, Queens, Restigouche, Saint John, Sunbury, Victoria, Westmorland and York.

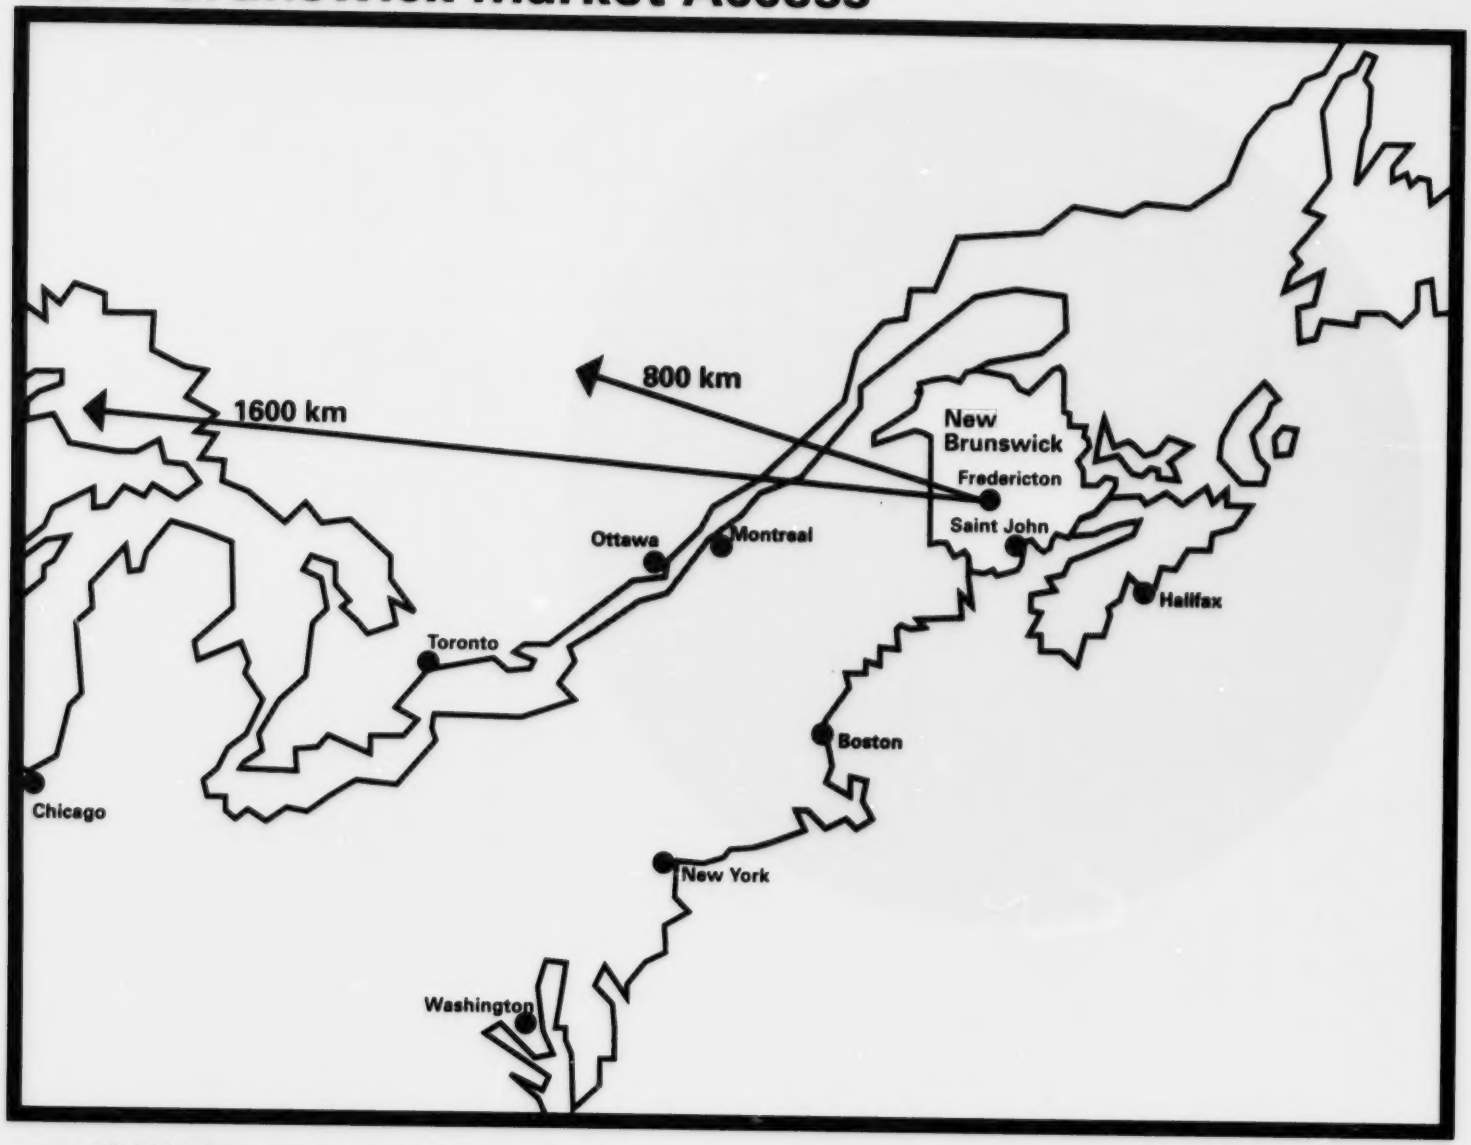
In this section every county constitutes a sub-section. Municipalities where manufacturing establishments may be located are listed alphabetically within each sub-section. Manufacturing establishments located in each municipality are grouped alphabetically.

For supplementary reference, Appendix 2 contains a municipal population index and a map of New Brunswick indicating the 15 counties.

SECTION 4
NEW BRUNSWICK MANUFACTURERS —
INDUSTRIAL PARKS CLASSIFICATION

The 43 industrial parks where manufacturing establishments are located are listed alphabetically in this section. The location of these parks is indicated and manufacturers located therein are listed alphabetically.

New Brunswick Market Access



43,000,000 consumers within overnight surface transportation

100,000,000 consumers within a 1600 Km radius

THE PROVINCE OF NEW BRUNSWICK

I. AN INTRODUCTORY PROFILE

LOCATION:

The Province of New Brunswick, on the Atlantic Coast of Canada, is a roughly rectangular area of about 28,000 square miles (73,440 square kilometres). Its approximate position on the map is between 45 to 48 degrees latitude, and 64 to 69 degrees longitude.

New Brunswick's capital city, Fredericton, in the southwestern part of the province, is 518 miles (829 km.) by highway from Montreal; 853 (1,368 km.) from Toronto; and 627 (1,003 km.) from New York. Flying time from the capital to Montreal is approximately 65 minutes; to Toronto, one hour 50 minutes; to Ottawa, one hour 30 minutes; to Boston (via Saint John), one hour and to New York (via Montreal), three hours, 10 minutes.

The province's major port city, Saint John, on the Bay of Fundy in the south, is 2,338 nautical miles from Panama; 2,977 from London; 3,020 from Antwerp; and 3,176 from Hamburg.

POPULATION & LABOUR MARKET:

On June 1, 1989, New Brunswick's total population was estimated at 718,600 persons, an increase of 4,300 or 0.6 per cent over the previous year.

During 1989, New Brunswick's labour force increased at a rate of 2.2 per cent to 325,000 persons. At the same time, the number of persons employed increased 1.4 per cent to 284,000. This increase was lower than that recorded by Canada (2.9 per cent). Over the 1971 to 1989 period, some 87,000 new jobs were created.

1989 LABOUR MARKET

Labour Force	325,000
Employed	284,000
Unemployment Rate	12.5%

ECONOMY

The New Brunswick economy historically has been characterized by a dependence on the primary industries. Proximity to the United States, the locational advantage of year-round ice-free ports on the Atlantic Ocean and historical, cultural and economic ties with Western Europe have resulted in reliance on trade in export markets.

In 1989, New Brunswick's Gross Domestic Product at factor cost (GDP) was estimated at $11.0 billion. During the 1971 to 1989 period, the Province's GDP increased at an average annual rate of 11.2%, the same rate as for Canada. Over this period, inflation-adjusted GDP for the Province increased at an average annual rate of 3.5%, compared with a 3.9% rate of growth for Canada.

The total value of New Brunswick's exports in 1989 declined 13.5 per cent to $3,049 million. This represented over 27 per cent of GDP at factor cost.

INDUSTRY

Although New Brunswick's industrial structure is still heavily oriented towards the extractive industries, the manufacturing sector is important as a generator of income and employment. During the 1971 to 1989 period, new capital invested in manufacturing in the province totaled over $4.8 billion. Major modernization programs and diversification into new products in the pulp and paper industries, as well as continued develo pment of the food processing industries were the major contributors to manufacturing investment.

INDUSTRIAL FACTS
1989

Farm Cash Receipts	$272 million
Seafish Landings Value	$88 million
Volume	151 thousand metric tons
Lumber Production	1,420 thousand cubic metres
Value of Mineral Production	$910 million
Value of Manufacturing Shipments	$6,152 million
Retail Trade	$4,832 million

Source: Statistics Canada, Various Publications.

In 1989, total wages and salaries in manufacturing increased 7.(per cent to $995 million. In addition, the value of manufacturing shipments in 1989 reached $6.2 billion, compared with $5.8 billion in 1988.

The long-term outlook for New Brunswick's manufacturing sector has been improved by the availability of government financial incentive programs which have led to a healthy sustainable manufacturing sector.

TRANSPORTATION;

The highway infrastructure in New Brunswick consists of more than 20,000 km of highway and approximately 2500 bridges and highway structures. The arterial highway network comprises approximately 2000 km, or about 10 percent of the total system length. This percentage includes the Trans Canada Highway which links the province with Quebec and Nova Scotia, as well as the United States eastern seaboard states.

New Brunswick is served by two railways: the Canadian National Railway and the Canadian Atlantic Railway (a division of Canadian Pacific Railway). Both of these railways provide regular freight and intermodal services. VIA Rail provides rail passenger services in New Brunswick.

Ocean vessels are accommodated in New Brunswick at year round ports located in (1) Saint John, (2) Belledune, (3) Newcastle/Chatham, (4) Dalhousie and (5) Bayside. Saint John, Belledune and Bayside are ice-free. The others are made accessible by icebreakers during the winter season. There is also a port located in Bathurst which is closed during four winter months. There are many other ports in New Brunswick which primarily serve the fishing industry, including: Caraquet, Shippagan, Richibucto, Bouctouche, Shediac, Cape Tormentine, Blacks Harbour, St. Andrews, North Head and Seal Cove.

Scheduled air passenger services are provided at Saint John, Moncton, Fredericton, Charlo, Chatham and Bathurst by Air Canada, Air Nova or Air Atlantic. One or more of these airlines serve each airport. In total, there are twelve public licensed airports in the province. A number of private operators provide charter air services. The Moncton airport serves as a hub for air cargo and air courier traffic for Atlantic Canada.

Intercity bus service is primarily provided by SMT (Eastern) Ltd. which has a province wide network with daily service. Smaller carriers serve other routes and interline with the SMT service.

II. DEPARTMENT OF COMMERCE AND TECHNOLOGY

The overall responsibility of the Department of Commerce and Technology is the development of the manufacturing, processing and selected service sectors of the New Brunswick economy.

The Department's major objectives are:

1. To strengthen and expand the industrial base in all regions of the province.
2. To ensure the ability of provincial firms to remain competitive through improvements in productivity and product quality.
3. To diversify the industrial base through growth in new products, expanded markets and new technologies.
4. To process New Brunswick's resources and products to the highest degree possible

These objectives are achieved through the programs and services offered by the Department.

The Department provides New Brunswick industry with financial support, loans, guarantees and venture capital assistance, and may also take an equity position in companies. In addition, the Department provides financial and advisory assistance for a wide range of activities, including management, marketing, trade and product development services. The Department also provides advice on government purchasing requirements and procedures.

— NEW BRUNSWICK INDUSTRIAL DEVELOPMENT BOARD

The Board, as provided for in the Commerce and Technology Act, meets regularly to assess and to make recommendations on all applications for financial assistance to industry. This assistance normally takes the form of a direct loan or loan guarantee.

— NEW BRUNSWICK INDUSTRIAL DEVELOPMENT APPEAL BOARD

If an application for assistance is rejected by the Development Board, the Commerce and Technology Act provides for the applicant to appeal this decision. The Appeal Board hears all appeals by allowing applicants to personally appear before it.

— PROVINCIAL HOLDINGS LTD.

A crown-owned corporation which holds and administers the Province's equity position in various companies, this agency may take an equity position in manufacturing and processing industries wishing to locate in New Brunswick.

III. REGIONAL ECONOMIC DEVELOPMENT COMMISSIONS

The Regional Economic Development Program provides for local participation in the economic development of each region of the province through the shared funding of autonomous Regional Economic Development Commissions.

The Regional Commissions provide an essential service in helping to identify and put into effect economic development opportunities within each region.

Functioning as independent agencies of the participating municipalities, the Commissions are in an excellent position to locate and encourage new entrepreneurs in their regions, and to support existing firms as well as assist in the delivery of other economic assistance programs.

BUSINESS OPPORTUNITIES SOURCING SYSTEM (B.O.S.S.)

As well as compiling the information contained in this directory, the Department of Commerce and Technology, in cooperation with Industry, Science and Technology Canada and other provinces, is helping to further develop a national sourcing system called "Business Opportunities Sourcing System" (B.O.S.S.). The system is now operational; and is used by federal and provincial governments, trade commissioners, Chambers of Commerce, consulting firms, etc. to assist potential buyers of Canadian products in locating appropriate manufacturers and to identify market opportunities for Canadian suppliers. B.O.S.S. incorporates the latest in information technology.

New Brunswick companies currently registered in B.O.S.S. are prefixed in this directory with the symbol "†". Expanded product descriptions and the names of company sales officials for these firms can be obtained by contacting any B.O.S.S. information centre. Such information can be obtained in Moncton from Industry, Science and Technology Canada 851-6424 or in Fredericton from the Department of Commerce and Technology 453-2629.
